Subject: Thermostat Recycling Corporation's 2012 Annual Report

Dear Mr. Greene and Ms. Jayne:

Attached is TRC's annual collection report for calendar year 2012. TRC has made its best effort to provide a comprehensive report on its efforts to promote the collection program in Illinois and improve the program's environmental outcomes. A copy of this report may be found on TRC's website at: <http://www.thermostat-recycle.org/media/index>.

While results are encouraging, much work remains. Access to the program continues to improve and participation has increased dramatically. However, our ultimate success is still dependent on HVAC contractor participation.

TRC continues to aggressively market its program in Illinois. We are working with HVAC wholesalers to increase the visibility of the program at their locations and will continue to push information about the program to HVAC contractors, technicians, homeowners, and others in the state.

TRC welcomes the opportunity to review this report with you and discuss our 2012 marketing efforts and plans for 2013. I may be reached at 571-447-4312 or by email at mark.tibbetts@thermostat-recycle.org.

Sincere Regards,

Mark Tibbetts
Executive Director

Collection Data

Exhibit 1: 2012 Illinois Collections by Brand

Brandholder	Number Thermostats	Number Switches	Total lbs Mercury
Bard	36	118	0.73
Burnham Holdings	6	6	0.04
Carrier	360	629	3.90
Empire Comfort Systems	2	2	0.01
General Electric Corporation	27	84	0.52
Goodman Global	33	50	0.31
Grainger	6	9	0.06
Honeywell	9,565	10,878	67.44
Hunter Fan	1	4	0.02
Invensys	120	118	0.73
ITT Corporation	15	25	0.16
Lennox	384	502	3.11
Lux Products	99	99	0.61
Marley-Wylain Company	24	44	0.27
Nordyne Corporation	36	48	0.30
PSG Controls	36	91	0.56
Rheem	59	65	0.40
Sears Holdings	121	131	0.81
Taco, Inc.	3	3	0.02
Trane	92	199	1.23
Uponor, Inc.	1	1	0.01
Vaillant Corporation	3	3	0.02
White Rogers	1,858	2,024	12.55
York/Johnson Controls	67	108	0.67
NOM	107	133	0.82
Loose Switches	-	2,452	15.20
TOTAL	13,061	17,826	110.52

In 2012, TRC recovered 110.52 pounds of mercury from 13,061 intact mercury thermostats and 2,452 additional loose mercury switches from Illinois collection locations for a total count of 15,144 thermostats (mercury thermostats recovered from Illinois locations averaged 1.17 switches per thermostat in 2012).

TRC recovered 8,024 thermostats from HVAC wholesale distributor collection locations and 222 from HHW locations.

Waste Mercury-Added Thermostat Management

Bins with waste mercury-switch thermostats are received at the fulfillment/processing center in Golden Valley, Minnesota. The facility is owned and operated by Honeywell International under contract with TRC.

Bins are received at the loading dock and sent to the TRC processing area. The bin and plastic liner are opened and the contents are identified, sorted, and tallied. The following data is recorded for each bin returned and

processed: bin number, business name (location name), city, state, zip code, date returned, number of thermostats and mercury switches by manufacturer and any non-conforming material.

The bin is returned to the location that sent it in with a new prepaid address label within 72 hours of receipt. The thermostats are stored and staged in a plastic lined carton in a storage area for final processing. The containers are dated and processed in order received, first in-first out.

The containers are returned from the storage area to the TRC processing area to have the mercury bulbs removed from the plastic housing. Universal Waste Regulations require the disposal of waste within 12 months of generation. TRC's processor requires that the disposal occur within 6 months of generation and TRC follows the more stringent requirement. Small

quantities of thermostats are removed from the container, which is then closed again, and placed at the bulb removal workstation on a tray that contains any potential mercury spillage. The bulbs are removed from the thermostats and placed into a 2 quart container at the work station. If a bulb breaks and the mercury spills, the work area is designed to contain the spillage and the operators are trained in the clean-up and disposal of mercury. The TRC processing area is equipped with special mercury vacuum cleaners and the work area is vacuumed at the end of the work day to assure that any spillage is cleaned up and not left to evaporate.

The 2 quart container is emptied into a special 55 gallon drum which is labeled and dated according to regulations. The drum is sealed with a band and is only opened when contents are being added to it. Special negative pressure venting assures any fumes are drawn away and vented when the drum is opened.

The 55 gallon drum is then shipped to Bethlehem Apparatus Corporation in Hellertown, Pennsylvania for final processing of the mercury ampoules (switches). Bethlehem Apparatus meets or exceeds all local, state, federal and EPA regulations for the management of the product. Bethlehem's approvals for mercury recovery/recycling include:

- EPA - identification No. PAD002390961 (Bethlehem Apparatus Co., Inc.)
- EPA BDAT Requirement - satisfied by all recovery operations
- CERCLA (Comprehensive Environmental Response Compensation and Liability Act)
- Pennsylvania Department of Environmental Protection

The facilities' processing follows all EPA guidelines and regulations. TRC has a facility license from Hennepin County Minnesota for the operation of the TRC. Honeywell, Inc. has a Hazardous Waste Generator license from Hennepin County. All persons who handle mercury thermostats as part of the TRC operation receive training in the handling of Hazardous Waste and Universal Waste.

Program Education and Outreach

TRC marketing and promotion efforts targeted key audiences in Illinois. Our objectives are to raise awareness of key components of Illinois' mercury thermostat law and to encourage the recycling of waste mercury thermostats. Below is a summary of activities and channels we utilized in support of this effort.

Development of Written Materials and Signage for Collection Points and Key Stakeholders—TRC developed and posted on its website (www.thermostat-recycle.org) a Promotional Toolkit which contains templates of a number of items for collection points to download and reproduce.

In 2012, TRC added one new item to the toolkit: a vehicle sticker (See Exhibit 2) for HVAC contactors to promote their participation in the program. TRC maintains an inventory of these stickers and provides them to contractors at no-cost. They are distributed upon request, and at industry events.

Wholesaler/HHW Engagement—Illinois’ law requires manufacturers to avail collection containers to HVAC wholesale distributors, thermostat retailers, and local governments upon request.

In **November 2012**, TRC sent postcards to approximately 256 collection locations in Illinois, the majority of which were wholesale distributors, reminding them to return TRC’s containers if they had not done so within a year. The card also provided TRC’s toll-free number and email address for additional information or to request replacement shipping labels and/or bin liners.

TRC exhibited at the **February 2012** Johnstone Supply annual meeting held in San Diego. Johnstone Supply is a buying cooperative and annually hosts an invitation-only trade show. TRC staff spoke directly with representatives from many of Johnstone’s Illinois locations during this event. TRC stressed the importance of participation and the potential regulatory consequences for not doing so.

Exhibit 2: Example of New Print Collateral—Vehicle Cling Sticker

In partnership with the Heating, Air-Conditioning & Refrigeration Distributors International (HARDI), TRC re-launched the Mercury Thermostat Recycling Awards in **May 2012**. The award(s) are intended to incent participation in the program by recognizing the distributor(s) that recovered the most mercury thermostats and/or developed innovative strategies to promote the program at their branch location(s).

TRC made several changes following the inaugural 2011 program. To increase participation, TRC branded the award program as the ***Big Man on the Planet*** award and challenged distributors to, “be in it to win it!” TRC developed custom invitation cards and mailed them to the principals of the 300 plus HARDI members to solicit their participation in the award

program. Email solicitations were also sent. To facilitate participation, TRC also printed and distributed custom window clings, counter cards, and flyers to participating locations.

To recognize participating distributors, TRC ran a ¼ page full-color advertisement in the **October 2012** edition of *Distribution Center Magazine*, which was also the “show” issue for the HARDI annual meeting.

The award was presented at HARDI’s annual meeting in **October 2012**.

Exhibit 3: *Distribution Center Magazine BMOP Advertisement*

Game on for BMOP.

Thanks go out to the companies listed here who are one step closer to being the 2012 BIG MAN ON PLANET. The winner will be announced in October at HARDI's Annual Conference.

Each time a mercury thermostat is recycled through us, a clear message is sent: we want to protect the environment by keeping mercury out of the waste stream. And that's why everyone on this list should be proud.

Keep recycling mercury thermostats. And make sure your team is ready to help you win BIG MAN ON PLANET bragging rights next year.

Summary of Additional Education and Outreach by Channel

TRC conducted an array of activities intended to raise awareness of Illinois’ mercury thermostat disposal ban, mandatory HVAC contractor recycling, and the ease of compliance through TRC’s collection program.

Earned Media—In 2012, TRC continued to enjoy positive and frequent coverage within the industry trade press. TRC issued a number of media releases and most were picked up, generating additional exposure for the program.

Notably, TRC continued to receive coverage in industry leading publications such as The Air Conditioning and Refrigeration News (110,000 circulation) and HVACR Business (circulation 30,000). HARDI ran a two-page article on the program in its *Conference Daily*, provided at no-cost to all attendees of HARDI’s annual meeting.

Website— Website traffic continued to grow in 2012. TRC has nearly doubled the monthly visitors to its site following a search engine optimization in fall 2011, along with other efforts to drive traffic to the site. Exhibit 4 below highlights the results of these efforts. In 2012, Illinois accounted for approximately 9.2% of TRC’s total website traffic, ranking only behind California in terms of the number of visitors.

Exhibit 4: Website Traffic Increase over Time

Web-based advertising— TRC continued the use of rotating banner advertisements in 2012, albeit with changes in scheduling and scope.

TRC ran web advertisements (Exhibit 6) on the websites *contractingbusiness.com* (160x600 skyscraper) and *hvac-talk.com* (300x250 medium rectangle) during the months of **September, October, November, and December** (four continuous months in 2012, as opposed to two consecutive months in the spring and fall in 2011). Together, the websites average over 2 million pages views and 340,000 unique visitors per month. HVAC-Talk.com, an online discussion community for HVAC technicians, boasts 145,000 registered users. HVAC-talk.com accounted for 5% of annual referral traffic to TRC’s website.

HVAC-talk.com and contractingbusiness.com, published by Penton Media, Inc., serve a national audience. According to their 2013 media kit, 100% of subscribers specify, design, install/service and/or make product selection for HVAC systems and equipment in residential, commercial, industrial, and institutional buildings.

TRC ran either a 120x600 skyscraper or 728x90 Leaderboard advertisements. The placement generated nearly 30,000 impressions as the newsletter experienced an open rate of over 40%. Copies of the newsletter remain available online continuing to earn TRC exposure.

Consumer Ads—TRC continued to test various consumer advertising strategies in 2012 and placed web banner advertisements in the *Chicago Tribune* (Leaderboard 728x90 above-the-fold), and *Springfield State Journal Register* (Leaderboard, 728x90, above-the-fold).

The advertisement had a simple message for consumers; encouraging them to engage with their HVAC contractors on the issue of proper disposal of waste mercury thermostats. Exhibit 5 below shows the first of three views of the interactive advertisement. The advertisement ran between April 16th and May 13.

Exhibit 5: Web Consumer advertisement (fixed image- first of three)

Google AdWords— In 2011, TRC developed and deployed a Social Media strategy that leveraged the power of Google and the popularity of Facebook. This campaign, which ran from mid-September through early December, geo-targeted contractors and consumers in states with mercury thermostat disposal bans, including Illinois, in an effort to create awareness and increase thermostat collections.

Exhibit 6: Web Banner Advertisement (300x250 fixed image version)

Ads and landing pages were developed with variable messages targeting both audiences. What made this campaign unique is the fact that it was targeted. Advertisements appeared on Google search results pages after an individual searched terms related to TRC's mission (E.g. thermostat replacement, contracting recycling regulations, mercury thermostat recycling, programmable

thermostats, etc.). Similarly, the Facebook campaign targeted users over 18 who "like" industry-relevant topics or organizations (i.e. renovating, renovators, HVAC, HVAC Technicians, home repair, etc.).

In 2012, TRC continued to refine new media strategies to promote the program. TRC implemented a Google AdWord campaign in early spring of 2012 targeting states with mercury thermostat disposal bans, including Illinois. The campaign yielded over 750,000 impressions with nearly 2,000 "clicks" and a click-through rate of 0.26% (a rate consistent with this type of campaign). The conversion rate on the landing page was quite high at 8.3% ("conversion" meaning a visitor clicked on the link to TRC's collection location search tool on the landing page). During the campaign, Illinois visitors to TRC's website increased by 122%.

Exhibit 7: Google "Landing Page:

Print Advertisement HVACR Business Magazine— TRC placed a ½ page color advertisement in a special section on thermostats in the April addition.

The purpose of this placement was two-fold:

- 1) Continue to build upon brand/program awareness of other promotional campaigns
- 2) Accelerate the pace of mercury thermostat replacement by helping contractors recognize opportunities to generate additional revenues by proactively replacing older mechanical (mercury) thermostats.

HVACR Business is a national publication with approximately 30,000 qualified subscribers, of which approximately 1,384 are within Illinois.

Exhibit 8: Advertisement Copy *HVACR Business Magazine*

Tradeshows—TRC attended and exhibited at the following trade shows relevant to Illinois:

January 23 - 25: AHR Expo. *Chicago*. AHR Expo is the largest national trade show for the HVACR industry. TRC staff exhibited and promoted the program to HVAC contractors, manufacturers, and distributors. The show had a total registered attendance of over 61,000.

February 21 - 23: Johnstone Supply Annual Membership Meeting. San Diego, California. Johnstone Supply is a cooperative wholesaler distributor of HVAC parts and equipment with 350 locations nationwide. Johnstone's Annual Membership meeting is invitation only and TRC was invited to attend and exhibit as part of an ongoing effort with Johnstone's corporate staff to encourage and expand the cooperative's member's participation in the program. The event is well attended by owners and senior staff and it was a unique opportunity to engage directly with key decision makers.

March 5 - 7: Indoor Air Expo. Las Vegas, Nevada. The show is a part of the Air Conditioning Contractors of America annual meeting. Approximately 700 attendees attended the event.

September 19 - 21: Comfortech. *Chicago*, Illinois. Comfortech is a national tradeshow for owners and managers of residential and commercial HVACR, Hydronics/Plumbing contracting firms to see the latest products and equipment.

October 8 - 12: ACCA Building Performance and Service Managers Forum. Austin, Texas. A week-long series of educational seminars focusing on building performance and service managers sponsored by the Air Conditioning Contractors of America. TRC exhibited and sponsored the registration bags.

October 6 - 9: Heating, Air-Conditioning & Refrigeration Distributors International (HARDI). Orlando, Florida. TRC exhibited and participated in the "Booth Program," which provides for 1-on-1 sessions with senior executive staff from HARDI member companies. This event targeted representatives of approximately 80% of the wholesale

market for HVACR products. TRC also presented its re-vamped “Big Man on the Planet Award.”

Direct Mail— TRC started a direct mail campaign in Illinois in 2012. TRC mailed a full-color postcard (see Exhibit 8) to the principals of approximately 3,100 Illinois HVAC contracting businesses in **April, May, September, and October**. TRC sourced the list of HVAC contractors from a commercial list supplier.

Exhibit 8: Front & Back of Postcard

TRC also sent postcards to approximately 380 contractors in the Chicago area inviting them to visit TRC’s booth at the AHRExpo in Chicago.

Miscellaneous Outreach—It is difficult to categorize and capture many of TRC’s activities in a narrative based report. While paid placements and copy is easy to report, social media and other activities are more difficult to capture. Some good examples of “miscellaneous” outreach include:

- TRC staff was invited by Honeywell International to present two webcasts through its 2012 “elearning LIVE schedule.” The first was entitled “Thermostat Mercury Recovery an Easy way to be Green,” and a second was entitled, “Understanding Health, Safety and Regulations in Managing Mercury Waste.” Archived copies remain available on Honeywell’s website at www.forwardthinking.honeywell.com/training/videos.html.
- TRC continued to encourage the placement of links to its website on member company websites and is pleased to report that links from members such as Honeywell,

Emerson/White Rodgers, and Lennox are significant sources of referral traffic to TRC's website.

- Stakeholder Outreach—TRC sent correspondence with a short newsletter article to housing (multi-family) 9 HVAC trade groups in Illinois. This included SMACNA and BOMA chapters in the state.
- TRC provided Honeywell rights for the use of its updated logo in product collateral. For example, the following was cut from product literature:

- TRC staff made considerable effort conducting direct outreach to senior management of HVAC wholesale distributors in an effort to 1) better integrate the program at their branch locations to ensure staff awareness of the program and program procedures and 2) leverage distributors' position in the channel to promote the availability of the program to their customers.

Program Expenses

TRC is a national voluntary program that is also operating nine mandatory programs on behalf of its manufacturer members. As most promotional activities are run concurrently in multiple states, tracking and isolating expenses specifically to Illinois is not possible. Below is a summary of TRC's national program expenses for 2012. TRC expenses include:

- TRC Staff and Administration: Includes staff, office expenses, telecommunications, information technology, office supplies, office lease, and other administrative expenses. Includes staff labor costs to implement Illinois program.
- Insurance: Pollution and liability insurance.
- TRC made \$47,166 in direct incentive payments on behalf of manufacturers as required by Maine and Vermont law. This does not reflect the administrative costs associated with the incentive program.
- Travel: All travel in 2012 and includes travel to trade shows to promote program.
- Recycling Costs: All costs (including labor) associated with transporting, processing, and properly managing waste thermostats. Also includes cost associated with fulfilling new bin orders and data entry of bin receipts.
- New Collection Containers: Direct cost for new containers ordered in 2011.
- Marketing/Outreach & Printing: Includes direct costs to develop and print program collateral; direct mail, national and state advertising, sponsorships, marketing consultants,

some web consulting, and other outreach activities. Marketing/Outreach does not include any TRC labor costs.

Exhibit 9: 2012 Program Administrative Expenses

Program Component	TRC Program
TRC Staff and Administration [†]	\$246,162
Recycling Costs	335,613.25
Insurance	\$2,430
Statutory Incentive Payments	\$47,166
New Collection Containers	\$27,495
Travel	\$25,994
Legal	\$66,303
Direct Expense for Marketing & Outreach	\$169,840
Total (expenses)	\$921,004

Recommendations/Next Steps

Illinois' thermostat law went into effect in July 2011 and while results are encouraging, challenges remain. Some challenges include:

- Maintaining records of collection points: TRC has provided bins to HVAC wholesale locations since 2002. Many locations have ordered additional bins over time. As many of these bins have never been returned, the result was a location data base that included many old records, as locations have moved, gone out of business, and/or been acquired. In 2012 TRC made significant efforts to clean its database, consolidate bin records, and improve data quality. This work is ongoing and continuing investments in TRC's database is also facilitating this efforts.
- TRC increased the scope and reach of its promotional campaign in 2012. *It is still too early to fully assess the impact of this expanded outreach on the program in Illinois.*
- TRC again tested advertising targeting the general consumer audience. TRC evaluated program results and the results reinforced our belief that consumer disinterest of the issue limits the viability of more expansive consumer facing advertising. Far greater value is achieved by targeting the trade channel and using targeted campaigns using Google AdWords and search engine optimization.
- Wholesaler participation continues to improve and our strategy of direct engagement with senior management of distributors is yielding positive results. TRC has targeted certain distributors and will continue efforts to engage.

In an effort to sustain and increase collections, TRC plans on the following modifications to the Illinois program:

- Expanding the scope and frequency of paid advertising targeting the trade channel in Illinois. TRC is placing four insertions in the Illinois' edition of the *HVAC Insider* for

the first time and increased the frequency of its advertising in other HVAC trade publications. TRC has shifted its strategy to one of more frequency to saturate the market over the course of year.

- In lieu of general consumer ads, TRC is running a Google AdWord campaign targeting contractors and homeowners searching for information relative to thermostat replacement. This campaign will focus on states with disposal bans, including Illinois. The campaign started in March 2013 and will continue intermittently throughout the year. TRC is evaluating the program on an ongoing basis to adjust scope of the buy and key search terms.
- TRC added staff at the start of 2013 by hiring a full-time marketing and communications person. This allows the program to expand both the scope of its marketing activities and also shift current staff to focus on program operations and customer support, including more active and constant contact with TRC's collection location partners.
- At the time of the report, TRC is completing a series of training videos for both collection points (wholesalers) and contractors. These short videos (less than 3 minutes) will be posted on TRC's website, Youtube, and other social media. It will be provided to HVAC technical training programs, wholesale distributors and HVAC industry trade groups. TRC also plans on distributing the videos on thumb drives at industry events and trade shows.
- TRC will continue its direct mail campaign in Illinois in 2013. TRC will source the list from a different provider and also increase the size of the mailing. TRC also plans on a more targeted campaign. Four mailings are planned roughly 3 weeks apart; again the strategy is frequency and market saturation.
- TRC will continue to send "reminder" postcards to collection locations in 2012. Investments in TRC's database will enable the program to better target certain locations and encourage participation.
- TRC will more actively use social media as a means to engage with the HVAC industry and promote program participation and recognition.

APPENDIX D: 2012 THERMOSTAT RECOVERY TOTALS BY LOCATION (note—this report rolls all bin receipts into aggregate collections by each location with some exceptions)

Business Type	Company Name	City	Zip	Number Thermostats	Count Tstat Switches	Count Loose Switches	Count Total Switches	Total lbs Mercury
